

# **SM620**

Dental Surgical Microscope

## **Modern Micro Treatment**

### 5 in 1 Module

Integrate 30° extender, beam splitter, rotation ring, 4 K camera and iris diaphragm, not only improves the optical performance, but also reduces the weight of external accessories. Internal 4 K camera with lower noise, higher sensitivity and resolution. The iris diaphragm is able to control the depth of field.

### **Single Finger Control**

With only one finger, you can reach the magnification knob, multi-function konb and variofocus objective lens with upright sitting postition.

### **Multiple Filter Modes**

By using the multi-function knob, you can change the filter modes.

### Orange filter

Used for material filling, can prevent resin material curing too fast.

### White light source

Using medical LED light source with high CRI, excellent color restoration and uniformity of lighting spot.

#### Green filter

Used for observing the small vessels and bleeding points in ths blood environment.

### Fluorescent filter(opt.)

Used for distinguishing resin materials and finding the hidden caries.

Equipped with dual-joint balance adjustment, the balance arm assures a ultra-smooth and ergonomic extension for dentists.

The LED display will be visually showing filter mode, zoom magnification factor and illumination statues.

### **Zoom System**

Continuous magnification system of 0.4 x to 2.4 x. Continuously view at the highest magnification without over or under-sizing the viewing field.

### **Cutting-edge Optics**

Advanced optical lens with Apochromatic Design (APO), able to remove color difference, improve articulation index and increase the depth of field.

### **Variofocus Objective**

Variable working distance of 190 mm - 460 mm

# **Specifications**

| Dental Surgical Microscope  | Classic   | Pro                       | Pro+ |
|---|---|---------------------------|------|
| Zooming-Magnification-Changer, 0.4 x - 2.4 x  | •   | •                         | •    |
